CROSSWORD

Each number on the grid represents a different letter. We’ve given you the letters to start you off — the rest is up to you. Write these letters wherever their corresponding number appears in the grid and then work out the identity of the other letters. All 20 letters of the alphabet will appear in the finished grid.

WORDS

Can you find all of the listed words in the grid? Words may run either forwards or backwards, in a horizontal, vertical or diagonal direction, but always in a straight, unbroken line.
