## Dilemma

Two straight crosswords - but their clues have been mixed up.
You have to decide which clue belongs to which pattern, but two words have been entered to give you a start.

## Missing Links

The answer to each clue is a word which has a link with each of the three words listed. This word may come at the end (eg HEAD linked with BEACH, BIG and HAMMER), at the beginning (eg BLACK linked with BEAUTY, BOARD and JACK) or a mixture of the two (eg STONE linked with HAIL, LIME and WALL).

## Codeword

This puzzle has no clues in the conventional sense. Instead, every different number printed in the main grid represents a different letter (with the same number always representing the same letter, of course). For example, if 8 turns out to be a ' $V$ ', you can write in $V$ wherever a square contains 8 .
We have completed a very small part of the puzzle to give you a start, but the rest is up to you.
