

A SPECIAL SELECTION OF PUZZLES FROM BEYOND SUDOKU

ENDVIEW

Place a letter from A-D in certain cells so that every row and column contains one of each letter. All other cells are left empty. Letters outside the grid indicate which letter is closest to that border.

ENIGMA

Reveal a hidden picture by shading certain squares. Apart from the 1s (which can be filled in immediately), each number is half of a pair. Join pairs of numbers so that the number of cells in a linking path (including the cells containing the numbers) is exactly the same as the numbers being paired. Paths may not cross one another. Once all paths have been completed, cells with paths can be shaded to reveal a picture

5	5		11	11				2	2			4	4
			7				8	3	1		8		
	7	4		4	3		3					10	10

4			7		2	2		5		5			5

FUTOSHIKI

Each row and column must contain a set of digits determined by the size of the puzzle (in the case of a 5x5 grid, the digits 1-5; for a 9x9 grid, the digits 1-9). Some digits are given. The given symbols tell you if the digit in a cell is larger (>) or smaller (<) than the digit next to it.

3	>		<	2	>	<		6
	6							7
			3		8	>		
8				5		<		3
			2		5			
	3							8
9								7
		7				5		

SUGURU

Fill the grid so that each cell in a bold outlined cluster of cells contains a digit. A cluster of two cells contains the digits 1 and 2; a cluster of three cells contains the digits 1, 2 and 3; and so on. The same digit must not appear in neighbouring cells, not even diagonally.
