

## Sign In details

Sign In puzzles are available in 5x5, 6x6, 7x7, 8x8 and 9x9 dimensions at all levels of difficulty.

## Sign In solving tips

When solving Sign In puzzles, the clues that *aren't* there are just as important as the ones that *are*. In the second row of our example puzzle, the 5 can only be positioned in column two, since placing it elsewhere in that row would mean that a 6 would have to be entered according to the signs. Following the 5, a 4 can now be written in below it. Now here's where the clues that *aren't* there come into play. If the 2 was placed in either of the shaded squares, either a 1 or 3 must be next to it. And there is no + or - sign linking these two squares. Therefore the 2 must be placed at the top.

Good luck!
