

BATTLESHIPS

A fleet of ten ships has gone missing – your job is to locate it. The ships you’re looking for are shown below, and the numbers around the outside of the grid tell you how many ships or parts of ships can be found in each row or column. We’ve found three parts of ships to get you started. Can you find the rest of the fleet?

HELPFUL HINTS

- Once a ship has been located, you can shade in every square surrounding it as a miss (as no two ships are touching one another).
- It may sound obvious, but remember that the Battleship can only be hidden in a row or column that is numbered 4 or above (as it has four parts to it).
