

## **SUMami**

Fill in some of the cells in the grid using digits from 1 to 9 according to the following rules:

- (1) No row or column may contain the same digit more than once
- (2) The numbers above and to the left show the totals of each group of adjacent numbers in the relevant row or column
- (3) There must be one or more blank squares separating the groups from each other.

Thus, a clue of 5 13 12 might lead to 5 - 4 + 1 + 2 + 6 - 6 = 9 + 3.
